

RAG System: PostgreSQL Data Model

Print-ready ERD from live Postgres: 8 application tables plus Alembic migration metadata.

documents schema

documents project_index_configs	
PK id	bigserial
FK project_id	bigint
UQ version	integer
is_active	boolean
embedding_model_name	text
embedding_dimension	integer
parser_settings	group
chunking_settings	group
rag_retrieval_settings	group
contradiction_settings	group
created_at / activated_at	time

documents projects	
PK id	bigserial
UQ name	text
description	text
state	text
created_at	timestampz
updated_at	timestampz

documents documents	
PK id	bigserial
FK project_id	bigint
name	text
EXT storage_key	text
size_bytes	bigint
mime_type	text
sha256	text
status	text
FK indexed_config_id	bigint
summary	text
failure_reason	text
created_at / updated_at	time

documents chunks	
PK id	bigserial
FK document_id	bigint
FK project_id	bigint
FK index_config_id	bigint
EXT qdrant_point_id	uuid
UQ chunk_order	integer
text	text
char_start	integer
char_end	integer
token_count / page_number	integer
created_at	timestampz

documents document_processing_jobs	
PK id	bigserial
FK project_id	bigint
FK document_id	bigint
kind	text
status	text
FK target_index_config_id	bigint
attempt_count	integer
last_error	text
claimed_by / claimed_at	claim
created_at / updated_at	time
completed_at	timestampz

analysis schema

analysis analysis_jobs	
PK id	bigserial
FK project_id	bigint
FK base_document_id	bigint
status	text
warning_message	text
error_message	text
results	json
attempt_count	integer
claimed_by / claimed_at	claim
created_at / updated_at	time
completed_at	timestampz

External file storage	
documents.storage_key	

analysis analysis_job_targets	
PK/FK job_id	bigint
PK/FK document_id	bigint

documents document_history	
PK id	bigserial
FK document_id	bigint
operation	text
details	json
created_at	timestampz

Qdrant vector store	
chunks.qdrant_point_id	

public metadata

public alembic_version	
PK version_num	varchar(32)
